

UK Fungus Day

Plant pot fungi:

Use our wonderful 'Mycokids' fungus templates drawn by the artist Lynne Ashby, to create plant pot fungi!

Print the templates onto thick white card. Cut around and glue a plant label stick onto the back of each template, allowing them to dry overnight.

Children can colour in the Mycokids characters and then stick the fungus into a plant pot to make a fun plant pot fungus partner!

Here is our 'Penny Bun' character next to the real thing!

British Mycological
Society promoting fungal science
